

Mab to Streptococcus B

Clone	1F9-P
Category	Mouse monoclonal
Purification	Protein-A affinity-purified from hybridoma culture supernatant
Ig Class	IgG _{2b}
Immunogen	Group B Streptococcus
Clinical Application/ Specificity	1F9 specifically reacts with Streptococcus group B specific carbohydrate antigen in immunofluorescence and, with latex particles as antibody carriers, by visible agglutination.
Application	<ul style="list-style-type: none">• Immunofluorescence• Immunohistochemistry on frozen and paraffin-embedded material (formaldehyde or methacarn fixation)• Agglutination
Working Dilution	Dilute 1:20 for immunofluorescence
Storage/Stability	At 4°C for min. 1 year
Quantity	1 ml ; contains PBS with 0.5% BSA as stabilizer and 0.09% NaN ₃ as preservative
Cat. No.	1F9-P
